EDUCATION

Georgia Institute of Technology

Master of Science – Computer Science (MSCS) – GPA: 4/4

August 2024 – December 2025

Atlanta, Georgia

Pune Institute of Computer Technology

Bachelor of Engineering – Computer Engineering – GPA: 9.69/10

July 2019 – June 2023

Pune

WORK EXPERIENCE

Salesforce

Software Engineer Intern

May 2025 – August 2025

San Francisco, California

- **Patent Approved:** Developed and patented an **AI Agent** Assistant for automatic guided creation of Salesforce Agentforce agents via predictive path planning and conversational flow design.
- Designed an AI Agent to search for security group deletions, reducing on-call resolution time to under 5 minutes.
- Developed a tri-Agent system to automate the Layer 7 DDoS threat defense service and enhance the Web Application Firewall (WAF) for internal Salesforce organizations using **MCP Server**, DataCloud, and AWS S3.

Georgia Tech - Data Center

Software Engineer - Student Assistant

September 2024 – May 2025

Atlanta, Georgia

- Deployed and configured **LINUX** (Ubuntu 22, 24 and RHEL 8, 9) on **Virtual Machines** and desktops for research labs.
- Utilized **SaltStack** and **Red Hat Virtualization** for configuration management, and **Cobbler** for OS deployment.
- Migrated the legacy database system to a new one based on the open-source Snipe-IT asset management system.
- Optimized **Python** scripts for automation tasks, system monitoring, & troubleshooting in the data center environment.

MasterCard

Software Development Engineer - 1 (full-time)

June 2023 – August 2024

Pune

- Debuted the Payment Passkey service allowing secure biometric payment transactions for **1M+** shoppers (View Here).
- Implemented services using **Java 11** and **Spring Boot**, and used **SQL** on **OracleDB** to manage database operations.
- Performed CI/CD operations with **Jenkins**, managed dependencies with **Gradle**, & generated API docs with Swagger.
- Migrated testing suite from Serenity to Karate, thus reducing the **REST API** test execution time by 40%.

Azodha

Software Development Engineer - 1

March 2022 – June 2023

Pune

- Built a Telemedicine software in **Node.js** with video-conferencing ability and integrated a **Socket.io** chat system.
- Implemented a scheduler service in **JavaScript** and **GraphQL** with appointment and user management features.
- Launched a v3 Chrome Extension in **React.js** and a web app acting as the replica of the mobile software.

PERSONAL PROJECTS

Quick Permit - Permission Software

October 2022 – May 2023

- Launched software to approve permission requests from 600+ college students to professors for conducting workshops and seminars. Digitized the existing paper-based system by creating a Node.js server using the **MongoDB** database.

Content Evaluation Using Natural Language Processing

August 2022 – May 2023

- Engineered an automated grading system combining 7 distinct content similarity and evaluation NLP models.
- Devised an algorithm to assign weights to ML models and integrated with a **Python Flask** web app with OCR.
- Resulted in more than 25% time reduction compared to the manual evaluation of assignments for final year students.

TECHINICAL SKILLS

Programming Tools and Languages – C++, Java, Python, JavaScript, TypeScript, HTML, and CSS, C, SQL

Web Frameworks & Libraries – Spring Boot, Node.js, React.js, Express.js, Redux, GraphQL

Databases – MongoDB, MySQL, and Cloud Firestore

Developer Tools – Git, AWS, Docker, Linux, JSON, XML, Agile, and Cloudflare Workers
