EDUCATION

Georgia Institute of Technology

August 2024 – December 2025

Master of Science in Computer Science, **GPA: 4/4**

Atlanta, USA

- **Relevant Courses:** Computer Networks, Network Security, Machine Learning

University of Pune - Pune Institute of Computer Technology

August 2019 – May 2023

Bachelor of Engineering in Computer Engineering, **CGPA: 9.69/10**

Pune, India

EXPERIENCE

Salesforce

May 2025 – August 2025

Software Engineering Intern

San Francisco, CA

- **Patent Approved:** Developed and patented an **AI Agent** Assistant for automatic guided creation of Salesforce Agentforce agents via predictive path planning and conversational flow design.
- Developed an AI Agent to search for security group deletions, reducing on-call resolution time to **under 5 minutes**.
- Designed a **multi-agent** system to automatically modify the Layer 7 DDoS mitigation algorithms, thus enhancing the Web Application Firewall (WAF) using **MCP Server**, AWS, Splunk, and Python.

Georgia Tech

September 2024 – April 2025

Graduate Assistant, Technology Services Organization

Atlanta, GA

- Managed Linux CPU & GPU servers running heavy Machine Learning workloads in the data center with **600+ servers**.
- Migrated the legacy database with **1500+ registered assets** to the open-source Snipe-IT asset management system.
- Deployed and configured **Linux** (Ubuntu 22, 24, and RHEL 8, 9) on Virtual Machines and Desktops for research labs.
- Utilized SaltStack and Red Hat Virtualization for configuration management, and Cobbler for OS deployment.

MasterCard

June 2023 – August 2024

Software Development Engineer - 1, Payment authentication team

Pune

- Debuted the Payment Passkey service allowing secure biometric payments for **1 Million+** shoppers (View Here).
- Reduced the **REST API** test execution time by an average of 40% by migrating from Serenity to Karate framework.
- Designed sequence diagrams and user schemas, developed a simulator service, and defined API endpoints to integrate 3DS (3 domain secure) authentication.

Software Development Engineer - 1, Checkout team

- Delivered the merchant validation service, performing checks on 30+ PII parameters (Personally Identifiable Information) with stakeholder bank approvals.
- Implemented services using **Java 11** and **Spring Boot**, used **SQL** on **OracleDB** to manage database operations, and performed CI/CD operations with Jenkins.

Azodha

March 2022 – June 2023

Software Engineering Intern

Pune

- Built a Telemedicine software using **Node.js** with video-conferencing ability and integrated a **Socket.io** chat system.
- Implemented a scheduler service in **JavaScript** and **GraphQL** with appointment and user management features.
- Launched a v3 Chrome Extension using **React.js** and a web app acting as the replica of the mobile software.

PROJECTS

Quick Permit - Permission Software | Node.js, React.js, MongoDB

March 2023

- Launched software to approve permission requests from 600+ college students to professors for conducting workshops and seminars. Digitized the existing paper-based system by creating a Node.js server using the **MongoDB** database.

Content Evaluation Using NLP | Python, Flask, Similarity Models

October 2022

- Engineered an automated grading system combining 7 distinct content similarity and evaluation NLP models.
- Devised an algorithm to assign weights to ML models and integrated with a **Python Flask** web app with OCR.
- Resulted in more than 30% time reduction compared to the manual grading of assignments for final year students.

SKILLS

Languages: C++, Python, JavaScript, Java

Backend: Spring Boot, Node.js, Express.js

Databases: MongoDB, MySQL, DataCloud, Firestore

Frontend: React.js, Redux, HTML, CSS

Platforms and Tools: AWS, Git, Linux

Experience with: GraphQL, Docker, PyTorch
